PYTHON FULLSTACK PROJECT

• **JOB CONSULTANCY WEBSITE**

It is an online platform where employers and job seekers can connect and facilitate the recruitment process. These website typically serve as a centralized hub for job listings, allowing employers to post job openings and job seekers to search and apply for those positions.

Key features:

The site allows clients to easily post job listings and edit, update, or delete them as needed. It includes a search feature for users to find jobs by title, a contact page for reaching out to clients, and automated email responses. Job applicants can register through a user-friendly form, and client data can be managed through the frontend admin panel.

Backend : Python Django

Frontend : React.js, JavaScript, Bootstrap, and CSS

Database : SQLite

PERSONAL PROFILE

- Full name : Muhammed Althaf K
- Gender : Male
- Date of Birth : 05/02/1998
- Marital Status : Single
- Religion : Muslim
- Father's Name : Aboobacker
- Passport No. : B6156511
- Current location : Abu Dhabi
- Visa status : Visit Visa
- Nationality : India

• **MINI GAMES ONLINE WEBSITE**

Mini-Games Online Website is an online mini games platform for playing a varieties of mini games .The site features a registration form and login form, allowing users to easily sign up and log in. What sets this project apart is its administrator-friendly Django admin panel, which enables game additions, edits, and updates. Additionally, I implemented a "Favorite Games" page for users to save their preferred games. All the games featured on the website are sourced from external sites.

Backend : Python Django

Frontend : JavaScript, Bootstrap, and CSS

Database : SQLite
